1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1 of the specification, prior to the "Background of the Invention" section, the following was inserted:

The present application is a continuation of Serial No. 09/266578, filed March 11, 1999, now U.S. Patent 6,319,594.

2. The following is an examiner's statement of reasons for allowance: The closest prior art, USPN 6,319,594, parent case to the instant application, has been overcome by the filing of a proper terminal disclaimer. Further, the Applicant submitted terminal disclaimers for USPN 6,146,753 and USPN 6,503,627 that have been approved and hence overcome the double patenting rejections recited in the prior office action. The other prior art references of record only teach the basic layered structure but do not teach or render obvious a hardcoat layer comprising an anisotropic conductive layer of which the volume resistivity in the direction of the plane in the layer is higher than that in the layer thickness direction.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
